Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

**CLAIMS 1-20, 25-28, 30 and 31 ARE PRESENTED FOR**  
**EXAMINATION**

Applicants' papers filed March 26, 2004 have been entered in the file and carefully considered. New claim 29 is drawn to a method of and not to a composition and is withdrawn from consideration.

Applicants' relates to an oral tablet composition. The claims are so drafted, comprising one or more drugs that act as a cyclooxygenase-2 inhibitor, croscarmellose sodium, and one or more pharmaceutically acceptable excipients, wherein at least one of the pharmaceutically acceptable excipients comprises a filler.

Applicant's arguments with respect to claims 1-31 have been considered but are moot in view of the new ground(s) of rejection.

**DETAILED ACTION**

***Claim Rejections - 35 USC § 102***

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Claims 1-31 are rejected under 35 U.S.C. 102(b) as being anticipated by Bertelsen et al. (6,713,089).

Bertelsen et al. teach the preparation of a quick release oral tablet (Example 19 and column 1, lines 4-10), excipients including applicants claimed fillers comprising

cyclooxygenase-2 inhibitors (see column 10, line 53 and column 11, lines 1-3) and croscarmellose sodium. See column 14, lines 59-60.

The excipients, fillers and binders of claims 6-20 are taught at column 14, line 16 to column, 15, line 36.

The amounts of agents to be incorporated into the tablet, claims 25-28, 30 and 31 are taught at column 6, lines 43-49.

Claim 29 is withdrawn as it recites a process and is within the non-elected invention. .

Since all of the elements of applicants' claims are within the the cited reference the rejection under 35 USC § 102 is deemed proper.

### ***Claim Rejections - 35 USC § 103***

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

This application currently names joint inventors. In considering patentability of the claims under 35 U.S.C. 103(a), the examiner presumes that the subject matter of the various claims was commonly owned at the time any inventions covered therein were made absent any evidence to the contrary. Applicant is advised of the obligation under 37 CFR 1.56 to point out the inventor and invention dates of each claim that was not commonly owned at the time a later invention was made in order for the examiner to

consider the applicability of 35 U.S.C. 103(c) and potential 35 U.S.C. 102(e), (f) or (g) prior art under 35 U.S.C. 103(a).

Claims 1-20, 25-28, 30 and 31 are rejected under 35 U.S.C. 103(a) as being unpatentable over Bertelsen et al. (6,713,089)

Bertelsen et al. teach the elements of applicants' claims. The difference between the reference and the claims is that the reference does not claim the specific components of the composition. However, one of ordinary skill in the art would be motivated to formulate applicants' claimed composition since all of the elements therein are known for the purposes claimed. The data has been reviewed and there is a lack of criticality set forth in the claims as to the excipients used in the formulation of the applicants' tablet. Further, the claims fail to recite the amounts which would illustrate unexpected and surprising results of the cited art.

None of the claims are allowed.

Applicant's amendment necessitated the new ground(s) of rejection presented in this Office action. Accordingly, **THIS ACTION IS MADE FINAL**. See MPEP § 706.07(a). Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire **THREE MONTHS** from the mailing date of this action. In the event a first reply is filed within **TWO MONTHS** of the mailing date of this final action and the advisory action is not mailed until after the end of the **THREE-MONTH** shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any

extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the date of this final action.
